FOR IMMEDIATE RELEASE

9 October 2009

ENDACE LIMITED

HALF YEAR TO 30 SEPTEMBER 2009: PERIOD END TRADING UPDATE

Endace Limited (“Endace”) (AIM: EDA, “the Company”), a world leader in network monitoring solutions, provides an update on performance for the half year ended 30 September 2009.

TRADING UPDATE

Endace expects to report revenues for the first half of approximately US\$13.7 million and profit before tax, adjusted for share option costs, of US\$0.5 million.

Mike Riley, Endace’s Chief Executive Officer, commented:

“Given world economic conditions, I am pleased with the progress Endace made in the first half of the year. For the first time, sales of our Ninja platforms and appliances exceeded sales of DAG cards, a significant milestone in our evolution. We have maintained our Research and Development spending, and continue to keep tight control over other costs. While customers still show caution over investment decisions, we enter the second half with a healthy order backlog and confidence in meeting market expectations for the full year.”

About Endace

For organisations that rely on their IP networks to do business, Endace provides high performance traffic analysis, latency measurement, network security and application acceleration solutions that capture, inspect and report on every single data packet. Our product portfolio includes high-speed packet capture technology, open development environments, multi-function network monitoring appliances and a comprehensive range of powerful yet intuitive management, measurement, alerting and analysis applications. We enable our customers to be confident in their service performance, traffic monitoring, information security, and regulatory compliance. Based in Auckland, New Zealand, Endace also has offices in the UK, USA and Singapore. Quoted on AIM, the stock code is LSE: EDA. For further information: <http://www.endace.com>
