FOR IMMEDIATE RELEASE

### **RSIGNIA AND ENDACE SIGN EXCLUSIVE AGREEMENT**

**Rsignia and Endace announced today that effective April 1, 2009 Rsignia became the exclusive sales channel, stock distributor and technology support for Endace Data Acquisition and Generation (DAG) card products and NinjaBox and NinjaProbe Appliances for all United States Federal related programs, both on the GSA schedule and on non-GSA schedule.**

#### **May 6, 2009 – Rsignia, Inc. Corporate Headquarters, Columbia, MD**

Rsignia, announced, today that effective April 1, 2009 they have signed an alliance agreement with Endace USA. As a result of this agreement, Rsignia is the exclusive technology support partner, stocking distributor and sales channel, for Endace Data Acquisition and Generation (DAG) card products for all United States Federal related programs. In support of these efforts, Rsignia will be the Master Contract Holder for GSA schedule, all other Government Wide Acquisition Contracts (GWACs) and all Intelligence, Department of Defense and Agency Specific Federal Contracts. In this agreement, Rsignia will also work with all Prime Contractors in support of their efforts with respect to the Federal Government and Federal Programs.

Endace DAG cards have been sold into more than 40 countries worldwide. The agreement will encompass all Federal and civilian projects involving Endace products. In addition, Rsignia will also be the exclusive sales channel for commercial-off-the-shelf Appliance Sales such as NinjaProbe, NinjaBox and any new off-the-shelf-appliances being developed for US Federal related programs.

“This agreement enables Endace to leverage the extensive relationships and reputation the team at Rsignia has established with its customers, while allowing Endace to focus its capital investment program on continued R&D and innovation,” said Mike Riley, CEO of Endace. “Our proven association with Rsignia gives us every confidence that all of the technology and high-level integration needs that will be demanded by the Federal sector will continue to be met.”

Tim Rieu, CEO of Rsignia said, “This agreement enables Rsignia to expand our product line and branding to include appliance technologies, and will help meet our corporate goal of growing our presence in the Federal sector,” adding, “We are excited to expand our working relationship with Endace, a market-leading security company specializing in real-time data management. They have a reputation that is unmatched and they are held in high regard in the IT security industry.”

With this new alliance, Rsignia's innovative and prominent engineering developments in a unified threat assessment and analysis toolset (Cynaafa), in addition to its string search project, is now in a prime position to move forward in their cyber counter intelligence offerings utilizing Endace's proven technology "inside." The Cynaafa project is in direct support to the Federal Intel community and has a very promising place in commercial areas such as SARBOX and FISMA.

###

### **About Rsignia, Inc.**

Rsignia is a solutions provider meeting security and infrastructure requirements of the federal and commercial market place. It has emerged as a leader in providing network security, protection, and digital assets monitoring and management. Rsignia delivers custom solutions that address new and emerging security issues including lawful intercept and data forensics.

With evolving cyber security mandates to address today's cyber warfare concerns, Rsignia's unparalleled engineering expertise in cyber counter intelligence solutions have a steadily growing install base within the Federal market and growing commercial marketplace. Through its large-scale systemic architecture approach, with full understanding from front-end data acquisition to threat detection methods, Rsignia provides comprehensive solutions tailored to the specific needs and requirements of its clients. As such, Rsignia has become known as "The X Factor in Cyber Warfare."

Rsignia holds an active GSA schedule contract #GS35F0705P.

### **About Endace**

For organizations that rely on their data networks to do business, Endace provides high performance traffic analysis, latency measurement, network security and application acceleration solutions that capture, inspect and report on every single data packet. Our product portfolio includes high-speed packet capture technology, open development environments, multi-function network monitoring appliances and a comprehensive range of powerful yet intuitive management, measurement, alerting and analysis applications. These products provide the broadest, most capable range of packet capture technology, for any interface, speed or packet type. We enable our customers to be confident in their service performance, traffic monitoring, information security, and regulatory compliance.

Based in Auckland, New Zealand, Endace also has offices in the UK, USA and Singapore. Quoted on AIM, the stock code is LSE: EDA. For further information: <http://www.endace.com>
