FOR IMMEDIATE RELEASE

ENDACE CONTINUES TO ATTRACT INDUSTRY TALENT

Auckland, New Zealand, February 19, 2008 - Endace Limited (LSE/AIM: EDA), a world leader in network monitoring solutions, today announced a series of new hires re-enforcing the company's transition from a supplier of data capture cards to an appliance-based solutions provider. Representing years of collective experience in networking and security, the latest additions further enhance Endace's ability to successfully sell, deliver and support DAG[®]-powered solutions for security, monitoring and analysis applications across their target markets.

- Chris Komatas, formerly from Juniper Networks, has been appointed Director of Product Management and Operations. Reporting to Mike Riley, CEO, Chris will be responsible for Product Lifecycle Management and Operations for all Endace Products and Services worldwide;
- Patrick Hurd, formerly Director of EMEA Sales and Business Development for Cintis International, will lead Endace sales across Central and Eastern Europe plus the Middle East;
- Stuart Beattie, most recently Systems Engineering Director for Network General, will serve as the Sales Engineering Manager for the same region;
- Marty Griffith, formerly from SOURCEfire, will lead Inside Sales activities for sales of NinjaProbe appliances in North America;
- Adrian Belcher, formerly with Newbridge Networks and Lucent Technologies, will advise accounts in the UK and Northern Europe as a new Sales Engineer.

"Our ability to recruit industry talent with strong experience in our target markets is a further endorsement of our vision and strategy as a next generation solution provider" said Mike Riley, CEO of Endace.

Riley said that the experience Chris Komatas gained at Juniper Networks will be pivotal in guiding Endace product development: "As Director of Product Management and Operations, Chris will help shape the architectural vision for our next generation network monitoring solutions. He is the ideal leader to ensure that our solutions meet the needs of large network operators now and over the long term."
