

# EndaceProbe 2184 G5 Series

EndaceProbe™ 2184 G5 Series Analytics Platforms provide 100% accurate Network History recording and Playback™ on four Ethernet links ranging from 10 Mb/s to 10 Gb/s, or a single 40 Gb/s.

Sustained write speeds up to 40 Gbps make the 2184 G5 Series ideal for continuous recording of high-speed links or deploying in remote locations where the 2184 G5's ultra-reliable SSD storage ensures long retention times and low-touch maintenance.

Smart Truncation™ and compression enable even longer look back by increasing effective storage depth of up to 120 Terabytes.

Application Dock™ allows your choice of security and performance monitoring or analytics applications to be hosted directly on the EndaceProbe. Hosted applications can access live traffic for real-time analysis or, using Playback, recorded traffic for back-in-time analysis.

Multiple EndaceProbes can be seamlessly connected to form a scalable, centrally managed recording fabric with a capacity of Petabytes of Network History storage.

## 100% Accurate Recording

Dedicated hardware provides lossless capture with nanosecond accurate timestamping.

- Definitive evidence for quickly and accurately resolving security threats and network or application performance problems
- Built-in compression optimizes storage capacity
- Smart Truncation can auto-truncate encrypted or non-compressible packets to maximize storage.

## Built-In Investigation Tools

- Analyze Network History with EndaceVision™, a powerful, browser-based traffic analysis tool
- Decode packets without download using hosted Wireshark™
- Analyze to microsecond level with Microvision
- Application classification for 1200+ applications.

## PERFORMANCE <sup>1</sup>

**Write to disk** 40 Gbps sustained  
20 Million packets per second  
Unlimited microburst @ 40 Gbps

**Maximum Flow Creation Rate** 400K flows/sec

**Maximum Concurrent Flows** 6 Million

**Number of Application Dock Instances** Up to 8

**Storage depth** 46 Terabytes SSD  
Packets <sup>2</sup> up to 120 Terabytes

**Physical size** 1U Compact Rack Mounted

**Secure** FIPS 140-3 and  
NIAP NDCPP 2.2E Compliant

<sup>1</sup>For more information about real-world performance testing refer to our "Network Recorder Performance Measurement" whitepaper. Performance above was tested using OSm 7.1.5 with EndaceProbe set to performance mode and 20°C ambient temperature.

<sup>2</sup>Effective packet storage accounting for RAID and metadata overheads and assuming a 4.5:1 ratio for compression and Smart Truncation of packet data

## BENEFITS

### 100% Accurate

On demand access to 100% accurate, rich Network History provides conclusive evidence for investigations.

### Powerful

Automation and streamlined workflow integration enables faster investigations. This improves security and reduces the impact of network and application performance issues.

### Open

Bring clarity to every incident or issue with an open packet capture platform that integrates with all your commercial, open source or custom-built tools. Host third party or open source security and monitoring tools right on the EndaceProbe appliance.

### Scalable and Reliable

EndaceProbes are engineered for ultra-high reliability, longevity and security. Centralized management enables scalability and reduces OPEX costs.

### Secure

Sensitive Network History data is protected via Role Based Access Control and Endace's security-hardened operating system (OSm). Compliant with FIPS 140-3 and NIAP NDCPP 2.2E.

### Freedom to Choose

Deploy your chosen security or performance monitoring tools on EndaceProbe without truck rolls or hardware upgrades.

- Central orchestration for fast, easy deployment
- Enable analytics functions on-demand to meet new requirements
- Analyze Network History without centralizing Petabytes of data.

### Workflow Integration

Rich APIs provide integration with commercial, open source and custom applications.

- Pivot directly from alerts in third-party applications to view related packets of interest in EndaceVision™ with Pivot-to-Vision
- Automate archival of packet traces with Pivot-to-Packets.

### Secure

- Only authorized users can view or download packet data. Role Based Access Control (RBAC) restricts who can access data.
- Compliant with FIPS 140-3 and NIAP NDCPP 2.2E.

### Network History Playback

Playback Network History on-demand to hosted or external analytics tools.

- Playback quickly for targeted scans or slowly for deep investigation
- Playback to real-time analytics tools for historical analysis
- Mine Network History, extract and download packet capture files for manual analysis.

### Provenance Enriched History

Provenance™ augments recorded Network History with rich contextual data.

- Self-describing packet traces support Big Data analysis, improve post-event problem resolution and simplify archiving
- Rich evidential trail for effective legal prosecution.

### Fusion Partner Program

Our market-leading, cybersecurity and network monitoring partners use EndaceProbe's API integration and Application Dock™ VM hosting to connect their solutions directly to Network History.

- Streamline and automate detection and investigation
- Choose from industry-leading network security and performance solutions
- Shared access to a common, authoritative source of Network History for all applications.

### EndaceProbe 2184 G5 Series – Technical Specifications

Minimum OSm release	OSm 7.1.5
Monitoring ports	Up to 4 x 10 MbE / 100 MbE / 1 GbE / 10 GbE or 1x 40 GbE <sup>3</sup>
Management interfaces	4 x 100 MbE / 1 GbE, 4 x 10 GbE 1x IPMI
Timestamp synchronization source	1PPS, IRIG-B or PTP via timing port, and NTP via management port
Timestamp synchronization accuracy <sup>4</sup>	Within 100 ns of PTP, 1PPS or IRIG-B source, with 4 ns resolution
Size	1U 19-inch rack mount
Dimensions	Height: 42.8 mm (1.68") Width: 482.6 mm (19") Length: 471 mm (18.54") 408 mm (16.06") Ear to rear wall
Weight	11.2 kg (24.7 lbs)
Power supply	Dual redundant 1400 W AC PSU or Dual redundant 1100 W -48 V DC PSU
Maximum power consumption	500 W
Operating temperature	10-35°C (50-95°F)
Operating humidity	8-90% non-condensing
Maximum heat load	1365 BTU/hr
SSD lifetime	56 TB of packet data written per day for 5 years

<sup>3</sup> 40 GbE support will be available via future software update.

<sup>4</sup> Excluding offsets or error introduced by clock distribution network or reference clock inaccuracies.

### Companion Products

A wide range of fiber optics and electrical transceivers is available. Contact sales@endace.com for details.
